About Me

Computer Engineering student passionate about **cybersecurity**, with hands-on experience in **AI-powered security projects, CTF competitions,** and **secure software development**. Strong **problem-solving skills** and a commitment to building practical, **real-world security solutions.**

Education

Fr. C. Rodrigues Institute of Technology **Jul 2023- Present**
Bachelor of Engineering in Computer Science, CGPA: 7.33

Fr. Agnel Multipurpose School And Junior College **2021-2023**
HSC Board (PCM ,Percentage: 65.33%)

Carmel Convent High School **2009-2021**
SSC Board 81%

Projects

- **Vigilia AI – AI-Powered Cyber Threat Detection & Response Platform**

Developed a full-stack cybersecurity platform that analyzes system and security logs to detect potential threats and generate actionable security insights. Implemented **log parsing, automated threat detection, risk scoring, MITRE ATT&CK mapping, and security analytics** through an interactive SOC-style dashboard. Built using **React, Node.js, Express, MongoDB, and JWT authentication**, with support for log uploads and real-time monitoring.

- **Phishing Link Detector**

Developed a **web-based tool** that analyzes URLs and classifies them as **Safe, Suspicious, or Phishing**. It evaluates factors like **HTTPS usage**, **domain structure**, **keywords**, and **WHOIS data** to generate a risk score and provide clear explanations. Built using **Python (Flask)** with **HTML, CSS, and JavaScript**. Focused on improving **user awareness** and enabling **safer browsing decisions**.

Programming Languages and software

Programming Languages : C , SQL Database , Python
Design Application : Android Studio , VS code
Operating System : Kali,Linux , Windows

Workshop , Training & Seminar

- Successfully completed **ISC² Certified in Cybersecurity (CC)** certification (2025), validating foundational knowledge in cybersecurity principles, risk management, and security operations issued by **(ISC)²**.
- Successfully completed the **"Cybersecurity: Web Application Security & SQL Injection"** courses on **Udemy**, gaining practical exposure to web application security testing, web vulnerabilities, SQL injection techniques, and secure coding practices.

Achievements

- Secured **1st Position** in HackerForge Capture The Flag (CTF), organized by Agnel Cybercell, **Fr.C. Rodrigues Institute of Technology, Vashi** (September 2025).
- Competed in a Capture The Flag competition at **MIT Bengaluru**, securing **3210 points** and placing in the **Top 15 out of 60+ teams**.
- Attained a **97 percentile** in the **Joint Entrance Examination** (JEE) Main.
